Jeff Bobrow
Technical Director, Spectrum Advanced Training Technology Laboratory
Old Dominion University

Jeff Bobrow is Technical Director of the Spectrum Advanced Training Technology Laboratory (SATTL) at Old Dominion University. He is a systems engineer and educator with more than 36 years of experience in the Federal sector and a proven record of leading high-performing, critical-thinking technical teams. His expertise includes Model Based Systems Engineering, Test and Evaluation, and Agile software development. From 2001 to 2020, he served as Director, C4I and Space, for the Commander, Operational Test and Evaluation Force. He then worked as an instructional designer and instructor at AVIAN, where he taught new Operational Test Directors Naval operational testing and DoD acquisition and served as a principal senior systems engineer on the USMC Future Vertical Lift programs. Bobrow earned a Master of Science in Systems Engineering from the Johns Hopkins Whiting School of Engineering and a bachelor's degree in Electrical and Electronics Engineering from Old Dominion University.
