

INCOSE Citation Quick Guide

(This guide is an abridged and adapted version from the “Chicago-Style Citation Quick Guide,” website of the *Chicago Manual of Style (CMOS)*, <http://www.chicagomanualofstyle.org>. This document is for informational use by authors submitting written content to INCOSE; it is not for reproduction or distribution.)

“*The Chicago Manual of Style*’s author-date system has long use by those in the physical, natural, and social sciences. In this system, authors cite sources briefly in the text, usually in parentheses, by the author's last name and date of publication. The authors provide full citations in a list of references, where they provide full bibliographic information.”

Citation Considerations

- *Titles*. We capitalize all titles headline-style; italicize book titles, with article titles non-italicized and surrounded by quotation marks.
- *Articles with only one or two references*. We request that authors just use parenthetical citations in the text: for example, “A basic introduction to the discipline is in Eric Aslaken’s *Systems Engineering* (1991).”
- *Capitalization of hyphenated compounds*. We capitalize both terms in a hyphenated compound in headline-style capitalization: for example, “An Introduction to Model-Based Systems Engineering.”

Sample Citations

“The following examples illustrate citations using the author-date system. We show each example of a reference list entry accompanied by an example of a corresponding parenthetical citation in the text. For more details and many more examples, see chapter 15 of *The Chicago Manual of Style*.”
