

Daniel Brookshier has 40 years of experience in software, modeling, and engineering. He is currently serving on the Architecture Board of the OMG and as a senior solutions Architect at Dassault Systèmes. Daniel is a former chair of UPDM (now UAF) and the current chair of the CubeSat System Reference Model Profile Revision Task Force. Daniel is also one of the original customers of CATIA Magic/Cameo/MagicDraw (user #14), so about 30 years as a user and 10 as Chief Architect overseeing the development of UML/SysML/UAF products. He is certified by the OMG in UAF, UML, SysML, and SysMLv2. Daniel serves Dassault customers as a Senior Process Consultant where he solves larger customer issues, continuing education of clients on tool, process, and techniques and is specializing in integration and use of Large Language Models and AI agents for MBSE and Dassault Agentic (GEN7) products for MBSE and general engineering applications.
