

Sos A. Mboijana, MD, is the Regional Medical Director for AI and Emerging Technology at Kaiser Permanente Mid-Atlantic Permanente Medical Group and a practicing internal medicine physician. He is board certified in Internal Medicine and Clinical Informatics and has been in practice in the DC Metro area for over 20 years.

In this role he leads the group's digital strategy, partnering with clinical and operational teams to improve care delivery, physician workflow, and the member experience.

Dr. Mboijana continues to enjoy the day-to-day practice of primary care and values Kaiser Permanente's integrated model, which enables team-based, high-quality, and coordinated care for members.

He provides executive oversight for clinical technology initiatives, supports the implementation of tools that enhance documentation and virtual care, and frequently speaks on healthcare innovation.
